

Cadetship Opportunity

CIVIL ENGINEERING CADET

About the Company

RMA Engineers is a multi-disciplinary engineering consultancy offering design services across civil, surface water, structural, traffic, and construction management engineering. We provide engineering design and construction management services to a broad range of Australian industries, including agribusiness, major infrastructure, land development, and the built environment.

Join a dynamic team within a company that boasts an impressive portfolio of exciting projects across multiple sectors. You will be supported by a group of experienced technical mentors, as well as your own dedicated career coach.

Potential exposure includes:

- Documentation and learning across civil, stormwater, and traffic engineering components
- Exposure to civil, stormwater, and traffic design and analysis
- Exposure to construction inspections and on-site understanding
