

TTPSS

TAG TEAM PATIENT
SAFETY SIMULATION

MEDICATION SAFETY

ACTION:

The Registered Nurse advises the nursing student that they do not need to supervise the administration of medications and then leaves the room.

MEDICATION SAFETY

ACTION:

The Registered Nurse asks the nursing student to sign the medication chart prior to administering the medications.

MEDICATION SAFETY

ACTION:

The Registered Nurse advises the nursing student that they do not have time to look up the medication at the time of administering but can do so later in the shift.

MEDICATION SAFETY

ACTION:

The Registered Nurse advises the nursing student to leave the medication at the bedside so that the patient can take it with their next meal.

MEDICATION SAFETY

ACTION:

The Registered Nurse advises the nursing student that they think the patient's family member mentioned that the patient may have an allergy, but as it's not charted, not to worry about confirming it.

MEDICATION SAFETY

ACTION:

The Registered Nurse advises the nursing student that they have total confidence in them, and that they can go ahead and give the medication while the Registered Nurse attends to the patient in the opposite bed.

MEDICATION SAFETY

**Observe and provide
feedback on:**

The nurses' adherence to the six
rights of medication safety.

CUE CARD

MEDICATION SAFETY

**Observe and provide
feedback on:**

The nurses' actions in monitoring
and documenting the effect of the
medication.

CUE CARD

MEDICATION SAFETY

Observe and provide feedback on:

The nurses' adherence to scope of practice and any actions taken to seek supervision for medication administration.

CUE CARD

MEDICATION SAFETY

Observe and provide feedback on:

The nurses' adherence to checking the patient chart for documented allergies and verification with the patient prior to administration.

CUE CARD

CLINICAL GOVERNANCE FOR HEALTH SERVICE ORGANISATIONS

**Observe and provide
feedback on:**

Anything that occurred during the simulation that jeopardised (or had the potential to jeopardise) patient safety.

CUE CARD

PREVENTING AND CONTROLLING HEALTHCARE ASSOCIATED INFECTION

**Observe and provide
feedback on:**

The cast members' hand hygiene.

CUE CARD

COMMUNICATING SAFETY

**Observe and provide
feedback on:**

The use of ISBAR in the simulation OR
the interprofessional communication
that occurred in the simulation.
