# TRAINING ONLY

v6.00 - 09/2016 Mat. No.: 10234583

# TRAINING ONLY

<b>Queensland</b> Government	
Queensland Adult Deterioration	
Detection System (Q-ADDS)	
For tertiary and secondary facilities	
Facility: COUni Hospital	
O an anal la atra atlana	

#### General Instructions

- » You must record all observations including Pain, Functional Activity Scale and Sedation scores (p4) at a frequency appropriate to the patient's clinical condition.
- » You must calculate a Total Q-ADDS Score for each set of observations and record it in the Total Q-ADDS Score box, even if the score is zero. (Respiratory Rate + O<sub>2</sub> Saturation + O<sub>2</sub> Flow Rate + Blood Pressure + Heart Rate + Temperature + Consciousness).
- » A Target systolic BP can be documented in the appropriate box on page 3 by the treating Registrar or SMO. The Target systolic BP will supersede the Usual systolic BP.
- » If there is no Target systolic BP the nurse admitting the patient should determine the patient's Usual systolic BP and record it in the appropriate box on page 3. If the Nurse is unable to determine the patient's usual BP tick the "Default systolic BP: 120mmHg" box on page 3.
- » When graphing observations, place a dot (•) in the appropriate box and join to the preceding dot (e.g. 🛰 ). For blood pressure, use the symbols indicated ( ). You must write any observation outside the range of the graph as a number.

#### Modifications for Patients with Chronic Abnormal Physiology

- » Modifications can ONLY be made on the basis of chronic abnormal physiology. That is, physiological parameters that are usual for the patient at home.
- » Modifications must be authorised by a SMO / registrar / PHO (or equivalent).
- » NB: document the letter "M" in the row above the Total Q-ADDS Score on page 2 to indicate modifications in use.

	fies modification (e.g. chronic	Write the accept	Write the acceptable range (will score zero) below:

Date:	Time:		NB: document the letter 'M' in the row above the Total Q-ADDS Score on page 2 to indicate modifications in use.				

### Temporary Modifications

- » Temporary Modification can only be made to ONE of the following Blood Pressure, Heart Rate or Respiratory Rate
- » Must have explanation and detailed management plan documented by Medical Officer (MO) in the case notes (headed: "Temporary Modification Plan 1, 2 or 3").
- » Caution should be exercised in prescribing Temporary Modifications for patients with suspected Sepsis.
- » Temporary modifications must be authorised by the SMO accountable for the patient or after consultation between at least two members of the Medical Emergency Team.
- » Each modification will last a maximum of 2 hours (1 box), sequential modifications are permitted for maximum 6 hours (all 3 boxes) but only 1 box can be completed for each MO review (i.e. MUST have MO review every 2 hours and modification prescribed into next box).
- » A Total Q-ADDS Score must be documented at least every 30 minutes.
- » Document the letter "M" in the row above the Total Q-ADDS Score on page 2 to indicate modifications in use.
