

1,146 students participated in the survey

NATIONAL STUDENT SAFETY SURVEY

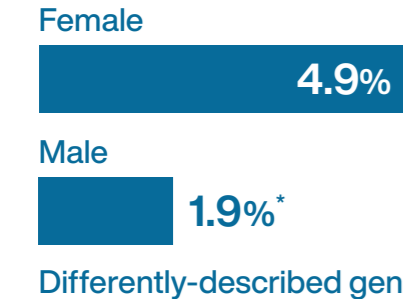

PREVALENCE IN A UNIVERSITY CONTEXT

Sexual harassment

Sexual assault

Experiences of sexual harassment in the past 12 months:

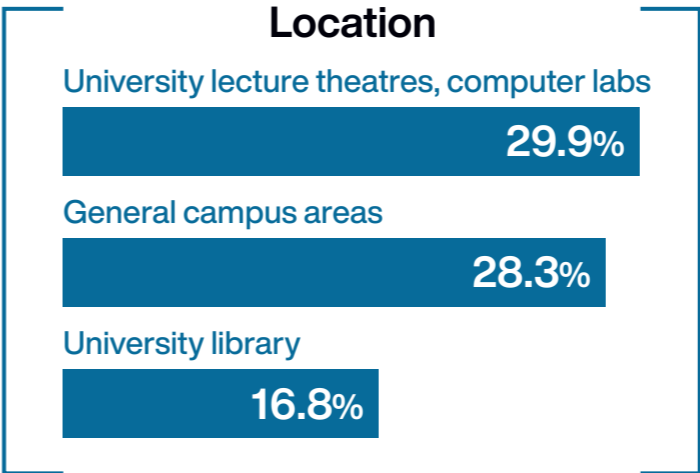

Experiences of sexual assault in the past 12 months:

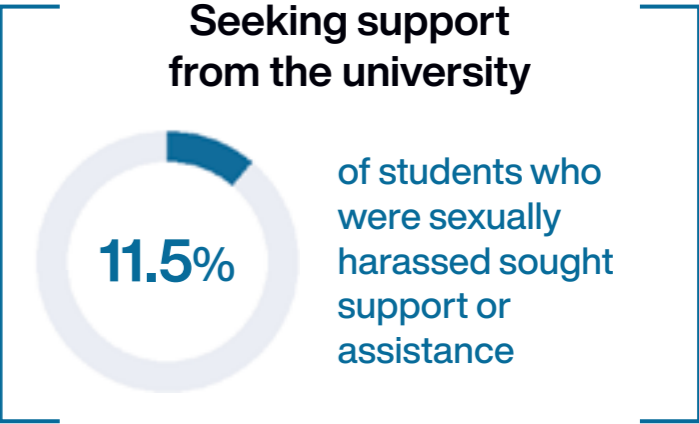

CONTEXT OF MOST IMPACTFUL INCIDENT

Sexual harassment

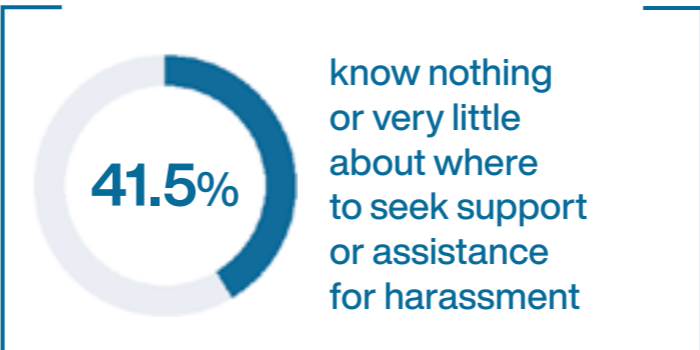

Asked of students who experienced sexual harassment in an Australian university context

REPORTING AND SUPPORT SEEKING

Asked of students who experienced sexual harassment in an Australian university context

Knowledge of university support and reporting channels

Asked of all students

Relative standard errors (RSE) were calculated for survey estimates. If the RSE was between 25% and 50% an * appears next to the estimate that indicates caution should be used with the associated estimate. If the RSE was above 50% an ** appears meaning the estimate is unreliable and not reportable. Differently described gender includes students whose gender identity was not classified as female or male. Gender identity was derived using the 'two-step method' of cross-classifying responses to sex assigned at birth and current gender. Context of most impactful incident. Students who had been sexually harassed in a university context were asked questions about the context of the most impactful (or significant) incident they had experienced. This incident was self-identified by the student.
